"Serving the Burbank Community since 1940"

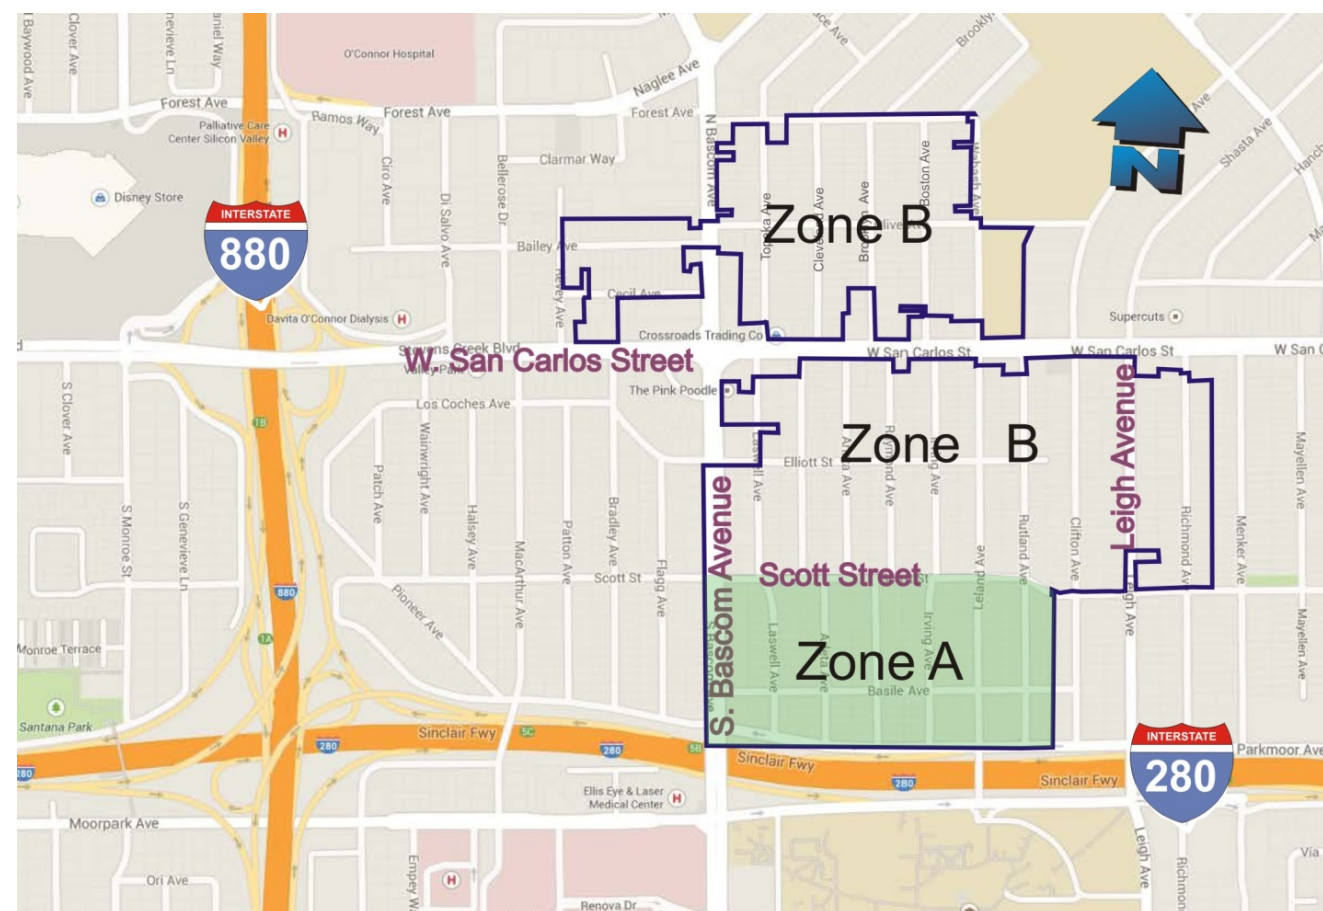

PUBLIC OUTREACH MEETING

The Burbank Sanitary District (District) sewer mains were constructed in the 1940's and early 1950's and have now exceeded their useful life. The District has completed a condition assessment of all sewer mains and has determined that approximately 70% of all mains will need to be rehabilitated at a cost of over \$4 million. Therefore, the development of a District Capital Improvement Program is needed and we would like all residents to participate in the development of this much needed program.

What: Public outreach meeting to discuss options of developing a District Capital Improvement Program.

When: Monday, November 10, 2014 at 7 P.M.

Where: Luther Burbank Elementary School

— Burbank Sanitary District Boundary

- There are two types of rehabilitations, identified as Zone A and Zone B.
- Zone A (located between Scott Street and I-280) will require all sewer mains to be fully replaced. Most sewer mains are located in the backyards between two properties. Because the sewer mains are located in the backyards, they are difficult to replace in the same location. District is considering several options to rehabilitate the sewer mains in this zone.
- Zone B is all other portions of the District which will require spot repairs. Sewer mains in Zone B are located in the street.

BOARD OF DIRECTORS

Michelle Kaelker-Boor – President

Keri Russo – Secretary

Rebecca Yoder - Director

Ken Colson - Director
