6. OLD BUSINESS

Old Business

- A. FY 2008-09 Sewer Service Charges. The Sewer Service Charge Subcommittee reported their findings to the Board. Directors Marke and Yoder reported that the projected increase in treatment plant O&M costs had increased by \$30K-\$50K each of the past three years and similar increases were to be expected in the future. The Board discussed the amount of the District's cash reserves and the possible application of these reserves towards capital improvement projects and the payment of O&M costs. Sewer service charge rates were not increase in FY 2007-08. Staff reported that there were enough cash reserves to complete the majority of repairs to the system and rehabilitation of existing sewer lines over the next several years. Staff reported that the District should ideally maintain in their reserves twice the amount of the annual operating budget. The subcommittee discussed the need for repair and rehabilitation. Director Smith stated that his preference was to spend a portion of the reserves on repair and rehabilitation, even if the annual budget would run a deficit over the next few years. The Board agreed that monies should be spent to upgrade and repair the existing sewer system. The Board discussed the proposed rate increases and agreed that a four percent (4%) increase each year over the next four years would be adequate to meet the increasing costs of the treatment plant O&M fees and agreed that funds should be allotted in the annual budget to perform repair and rehabilitation projects within the District.

Motion: To increase the annual sewer service charge rates for residential and commercial users four percent each year for the next three fiscal years (FY 2008-09, FY 2009-10, FY 2010-11)

- B. FY 2008-09 Annual Budget. The Board discussed the draft budget. Staff reported that the draft budget had remained unchanged from the last meeting and that the only items that would vary were the revenue from the sewer service charges, depending on rate increases, and the amount allocated to repairs and rehabilitation. Staff reported that an inventory of approximately forty (40) repairs had been cataloged. A report outlining the estimated individual costs would be prepared for the next meeting. A portion of main line running through an easement between Arleta and Laswell was a candidate

for a main line rehabilitation project due to the high number of deficiencies in the pipe. Staff would include an estimated cost for this project in the report to be presented at the next meeting. The Board agreed that funds should be spent to complete these types of projects and would review staff recommendations. The Board would review the report and determine the amounts to allocate in the operating budget. Director Smith indicated that he would like to potentially see a final budget approved at the next meeting.
